

## Service Level Agreement

### Preamble

Insofar as a specific service level (Bronze, Silver, or Gold) has been agreed in an Individual Order (which may be within a proposal or other individual agreement), retarus (UK) Ltd. (hereinafter referred to as "Retarus") shall provide the Customer with the services (hereinafter referred to as "SLA Services") described in this Service Level Agreement (hereinafter referred to as "SLA"). SLA Services refer to the communication services outlined in the respective Individual Order (hereinafter referred to as "Services"), and serve the purpose of expanding the performance parameters of these Services. The provisioning of SLA Services is carried out in accordance with the following terms and conditions unless otherwise agreed in writing between the parties. A text form requirement in this SLA shall also be fulfilled by stricter forms such as the written form.

### 1. Service levels and error categories

- Subject to the stipulations of the individual order, one of the service levels, either Bronze, Silver, or Gold, shall apply.
- Retarus provides SLA Services only as a service and only from Retarus' premises and/or Retarus' data centers.
- Errors are categorized as follows within the framework of this SLA:

<b>Category 1</b>	<b>Critical errors:</b> Services are permanently non-available.
<b>Category 2</b>	<b>Material errors:</b> The use of multiple material functions of the Services is not only temporarily impacted.
<b>Category 3</b>	<b>Minor errors:</b> Errors in Services, which are not critical or material errors.

Retarus shall classify errors based on Customer's reporting in accordance with Section 2 (c). Such classification shall be communicated to Customer upon or immediately after receipt of Customer's notification, as requested by Customer.

### 2. Customer Obligations

- The Customer shall designate sufficiently qualified contact persons, who are individually responsible for acceptance of the SLA Services. These contact persons shall be made available to Retarus during the applicable service periods (see Sections 4 and 5). The Customer is obligated to promptly notify Retarus in text form of any changes in contact persons.
- The Customer shall carefully document any errors related to the Services, as well as related symptoms and impacts, and promptly provide Retarus with the corresponding documentation.
- Customer error reports may be communicated by telephone or email, at Customer's option to the Retarus contact persons pursuant to Section 6. Retarus may require that error reports communicated by telephone be promptly confirmed by email. In such cases, the periods pursuant to Sections 4 and 5, take effect only upon receipt of such proper confirmation, provided that Retarus has requested such confirmation promptly following submission of the respective error report.
- In addition, Section A. IV and B. III. of Retarus' General and Special Terms and Conditions (GTC / STC) shall apply.

Retarus is exempt, while the payment obligations of the Customer continue to apply, from all service obligations that arise from this SLA, if and insofar as the provisioning of the SLA Services is impeded because

- the Customer is in violation of an obligation pursuant to Section 2,
- the properly reported error cannot be reproduced with reasonable effort, or
- the Customer does not use the Services as intended.

This exemption shall only apply if and once Retarus has informed the Customer accordingly in text form. Any statutory right of extraordinary termination or retention by Retarus shall remain unaffected.

### 3. Enhanced availability of the Retarus System

- The following availability shall apply to the data communication and data transfer systems that can be directly accessed and controlled by Retarus without involving a third party provider (hereinafter referred to as "Retarus System"): The part of the Retarus System relevant to the provisioning of Services for the Customer shall have the following availability in the calendar quarter average, depending on the service level agreed:

- The following availability applies to service level **Gold**: **99.8%**
- The following availability applies to service level **Silver**: **99.5%**
- The following availability applies to service level **Bronze**: **99.0%**

The aforementioned percentages correspond to the proportion of the calendar quarter (including day and night time, Sundays and holidays), during which Customer is able to use the Services. Temporary, maintenance-related system downtimes, as well as system downtimes due to force majeure or any other reasons outside the Retarus System shall not be considered when calculating any (non-)availability. In the event of conflicts or inconsistencies between the stipulations regarding availability in Section B. II. 2 of the Retarus' STC and the provision in this Section 3. (a), the (higher) availability stipulated herein prevails.

- Retarus shall determine the key indicators for evaluating compliance with the agreed availability on the basis of Customer's non-availability reports.
